

# Charles River Inventory Hub

Dealers have significantly reduced their inventories, driven by cost pressures and regulatory changes. This has hampered price discovery and impacted liquidity across global markets. In response, hundreds of liquidity venues have launched, with the goal of capturing buy-side order flow. While providing traders with new execution options, the sheer number of venues has also increased market fragmentation. The Charles River Inventory Hub and Order and Execution Management System (OEMS) provides asset managers with an effective solution to these challenges. The Inventory Hub processes and aggregates inventory across a number of the largest dealers and venues. Clients can view this inventory in the OEMS, receive updated indications of interest (IOIs) and quotes from dealers, and place orders for a full range of products and asset classes.

## Key Benefits

An aggregated, venue and dealer agnostic view of liquidity helps traders and portfolio managers:

- Reduce execution costs and facilitate price discovery by sourcing bids and offers from a broad range of venues and dealers
- Make more informed decisions on when and where to place trades
- Automate quote capture off the Indicative Price view

The Inventory Hub helps buy-side firms save the significant cost and effort required to establish FIX connectivity with multiple venues and dealers.

Charles River's Inventory Hub provides a single point of connection linking dealers with buy-side firms.
