

Initial Margin (IM) Analytics & Optimization for Front & Middle Office

OTC trading is more onerous and expensive than ever before. Cleared and bilateral margin requirements make holding costs and collateral requirements much more significant. True best execution needs to consider all the real world costs of holding a trade in the overall execution decision.

Charles River customers have access within the Investment Management Solution to pre-trade margin analytics and optimization services, including tools for Cleared OTC, Global Futures and Options (ETD), & Bilateral (SIMM). Customers can calculate what-if Initial Margin and carry cost on all available trading routes on derivative instruments prior to execution.

Regulations created in the aftermath of the financial crisis, including the Clearing Mandate for standardized swaps and BCBS/IOSCO margin framework for uncleared derivatives, require firms to post increasing amounts of collateral as Initial Margin. Additionally, the emerging Uncleared Margin Rules (UMR) now require designated firms to post and secure Initial Margin for uncleared swaps. CRD customers have access to a full ISDA SIMM Licensed calculator that provides on demand calculations at pre-trade, intraday & regulatory end of day requirements.

What All Firms Trading Derivatives Need To Know

OTC Cleared & Bilateral, Futures & Options (ETD)

Initial Margin impact (directly from CCP)

Cheapest CCP & clearing broker (FCM)

Lifetime Costs Analysis (IM, collateral funding impact, CCP & FCM fees)

Collateral - availability, trading impact & cost of usage

Front Office Benefits

The ability to obtain pre-trade estimates directly from the Charles River IMS as part of the OTC derivatives trading workflow helps improve trading decisions by providing an accurate and consistent view of margin impact and lifetime trade costs across the trade lifecycle. This helps firms make the most efficient use of scarce margin and minimize drag on portfolio returns. Charles River IMS also enables the front office to have full visibility into pledged collateral levels in real time.

Middle Office Benefits

Charles River IMS enables collateral management teams to stay in sync with trading activity. Informed by a timely view of available assets, teams can leverage electronic workflows to help ensure margin calls are fulfilled and communicated in a timely manner between the front and middle office.

About Cassini Systems

Founded in 2014, Cassini Systems offers award-winning derivatives margin analytical platform that provides the industry's only front-to-back margin and cost analysis across the entire lifecycle of a trade. Cassini users can calculate any margin on any cleared or uncleared derivatives asset; analyze drivers and movement in margin exposure; reduce Initial Margin levels, and maximize margin efficiency with the firm's industry-leading, advanced algorithms. Cassini services have a proven track record of enhancing portfolio returns at every point in the daily business cycle, empowering traders and portfolio managers with the ability to analyze instantly in the pre-trade stage the all-in, lifetime cost of a transaction. Top-tier hedge funds, asset managers, and Tier 1 banks rely on Cassini for powerful, flexible, automated tools to manage their portfolios of over-the-counter and exchange-traded derivatives products. In 2022, Cassini won 'Best UMR Service of the Year' in Risk. Nets Market Technology Awards. For more information, visit www.cassinisystems.com
