

FINCAD[®]

FINCAD Analytics in Charles River IMS

Combined with Charles River IMS portfolio management, risk and attribution capabilities, FINCAD provides clients with the necessary analytics to support and manage exposures, calculate fair values, and size trades appropriately.

Leveraging Charles River's single data model, natively calculated FINCAD analytics are compatible with analytics across all asset types, enabling accurate benchmark comparisons. This eliminates the need for external index-provider analytics systems.

FINCAD Analytics Available within Charles River IMS Include:

Analytic	Native Calculations
Trade-level	Price, yield, accrued interest, projected cash flows, factor, spread-to-benchmark
Sensitivities	Duration, modified duration, convexity, rate DV01, inflation DV01
Derivative-related	Option greeks, credit DV01, per-swap rate
Spreads and KRD	Valuation, Option Adjusted Spread (OAS), I-spread, Z-spread, spread duration, spread convexity, key rate durations

Consistent and Accurate Asset Valuation

FINCAD's analytics engine and industry-standard computational models helps ensure accurate, real-time valuations across fixed income and derivatives instruments globally. Firms can store and compare multiple reference data and pricing sources in Charles River IMS to help meet the valuation requirements of their investment process and asset mix.

Seamless Curve Construction

Accurate curve construction is key to helping traders and portfolio managers understand exposures, risk and performance. Charles River IMS leverages FINCAD to enable streamlined curve construction workflows directly from Charles River's portfolio manager workbench and trade blotter. Treasury, Swap and constructed curve-based analytics are available for:

- Sovereign Bond Curves from 32 separate nations
- Constructed Swap Curves in 15 different currencies
